Innovative Logistics Techniques, Inc. (INNLOG)

Business challenges

Government organizations at all levels face the challenges of migrating from legacy systems to more interoperable digital environments. Complex, archaic systems that don't seamlessly communicate with one another make for redundant information and functions that are highly inefficient and expensive. Labor-intensive business processes draw resources away from mission-critical functions. A trusted information technology partner can help agencies achieve efficiency and streamlined processing support services.

How we can help

The EDS Encore Alliance team, comprising 90 partners including many small disadvantaged business, brings its entire global resources to bear in order to solve even the most complex IT challenge. Whether your challenge is network-centric warfare, global operations, enterprise transformation or Homeland Security requirements, EDS, an HP company, can help you achieve measurable progress through streamlining, integrating and enhancing systems. EDS has nearly 40 years' experience serving government clients around the world with outstanding results. We help government agencies modernize business practices and aging systems, while leveraging new technologies and best practices. We do more, more effectively and efficiently, delivering the most value for agencies.

What you can achieve

- Leverages commercial best practices in your environment while increasing system efficiency and reliability
- Addresses critical aspects of Homeland Security initiatives and requirements
- Enables rapid access to benefits of successful public-private partnering
- Provides proven expertise in transforming and integrating global environments
- Draws on team's proven information assurance methodologies, including CMM-SSE certifications
