

EDS AND SYMANTEC JOIN FORCES TO OFFER END-TO-END SECURITY MANAGEMENT FOR ENTERPRISE CUSTOMERS

Together, EDS, an HP company, and Symantec offer integrated security and protection services to our clients around the globe. The alliance brings unprecedented domain experience, technology expertise, and thought leadership to provide our clients with innovative products and solutions to better secure and manage their information.

Partnership brings greater value to our clients

The EDS Agility Alliance partners are considered the top tier of our collaborative partnerships and represent broad-based companies that are globally recognized for their quality, products and value to clients. Collectively, EDS and its Agility Alliance partners collaborate to design, build and run a market-leading services platform and develop technology-based services that deliver tangible results to our clients.

Together, EDS and Symantec help our joint clients better secure their mission-critical business data and address specific enterprise security issues such as protecting business interactions, safeguarding critical information and IT infrastructure, optimizing security processes and compliance policies to protect organizations and identify threats.

- **Security Management** - Protect business interactions, critical information and IT infrastructure. Optimize security and compliance policies to identify threats and protect organizations against security attacks.
- **Endpoint Threat Management** - Improve threat monitoring and reduce the administrative burden of protection endpoints against known and unknown threats.
- **Content Monitoring and Data Loss Prevention** - Secure business information against threats of electronic messages.
- **Data Protection and Back-up Solutions** - Guard against the effects of planned and unplanned downtime.

"Symantec's membership in the EDS Agility Alliance marks our commitment and focused collaboration with EDS to provide the services, business processes and IT solutions our customers need to meet their business requirements."

Bill Robbins
Symantec

ABOUT THE EDS AGILITY ALLIANCE

The EDS Agility Alliance is a unique coalition of market-leading technology and business services providers aligned to build and deliver seamlessly integrated enterprise-wide solutions. Together, our best-in-class, multi-sourcing approach offers the applications, business processes and IT solutions you need to meet your requirements for growth, productivity and innovation from a single business partner.

Related EDS Offerings

Identity Management

Our approach is Enterprisewide and a crucial component of an overall security solution. Our solutions help companies establish identities digitally, verify individuals as authorized, and control what they can use and what they can do.

Data Loss Prevention

We create a secure Information Management structure to identify, classify and monitor your critical enterprise information, and prevent it from being passed on without authorization. Actively monitored and in line with corporate policies, we ensure your security risk management strategy stays secure.

Backup and Restore Services

Access to your most vital information, with a cost-effective, scalable solution that's customized to your needs.

Archive and Compliance Services

Cost-effective storage and data retention management throughout all phases of the data's lifecycle. Keep the data organized, searchable and accessible for regulatory compliance, audits or other archival research

What the EDS-Symantec Alliance means to you

EDS and Symantec have been working together for nearly a decade, implementing internet security, compliance, storage and risk management solutions for EDS clients. The extension of that existing partnership will ensure tested technology alignment and an ability to deploy solutions rapidly, ahead of the market demand.

Symantec and EDS also work together to proactively identify and address product trends, training needs, and process improvements. Additionally, through Business Critical Services, Symantec avoids interoperability problems and unnecessary downtime, helping EDS hit its cost and service availability targets.

EDS, an HP company, is a leading global technology services provider, delivering business solutions to its clients. EDS founded the information technology outsourcing industry more than 46 years ago. Today, EDS delivers a broad portfolio of information technology, applications and business process outsourcing services to clients in the manufacturing, financial services, healthcare, communications, energy, transportation, and consumer and retail industries, and to governments around the world.

Symantec is a global leader in providing security, storage and systems management solutions to help consumers and organizations secure and manage their information-driven world. Our software and services protect against more risks at more points, more completely and efficiently, enabling confidence wherever information is used or stored. More information is available at www.symantec.com.
