

SCENE Tsunami

The true test of any technology is not how well it works in ideal conditions but whether it's there when you need it in an emergency. During the tsunami, NMCI helped victim support teams stay connected to help save lives.

ANIM: Proven Performance

The Navy Marine Corps Intranet, NMCI... actively supporting the warfighter near and far - in the US, Far East, and extending to remote locations in the field ... NMCI connects more than 700,000 sailors, marines, and civilians in 620 locations.

SCENE: Norfolk, VA

Our men and women in uniform are always on the move. They need a network that can move with them CONUS, OCONUS. NMCI keeps our sailors and marines connected wherever and whenever duty calls.

SCENE: Japan!

NMCI delivers proven reliability. It's dependable access to information on demand. With its disaster recovery capabilities, NMCI keeps users focused on the mission not on their technology.

SCENE: Command Center

NMCI's defense-in-depth approach to security guards against unauthorized access in both classified and unclassified environments.

ANIM: Proven Accessibility

NMCI provides users with 24/7 access to information from the desktop to the laptop to the blackberry. Whether working in the Q or operating off Iwakuni, users simply plug in their CAC cards and can get right to work.

ANIM: A Proven Platform

The world's largest purpose built IT network transforming information sharing from business to battle space through interoperability and innovation.

ENDING

NMCI ... delivering tomorrow's technology platform - today.
